INTERNSHIP REPORT

Department of Computer Science Engineering

Session: [November 2025]

Submitted by:

Name of Student: **Ghanshyam Kumar Jha**
Enrollment No :24TEC2C440

Section: D

Course: B.TECH (C.S.E)

Submitted to:

Mentor Name: **Dr. Himanshu Sharma**

(Professor, Department of Computer Science Engineering)

Internship Details

Organization Name: **Linux World**

Internship Domain: Python AI ML

Internship Duration: From 18 November to 28 November

Certificate ID (if provided): ID: U72900RJ2012PTC039171

Mentor at Organization : Training & Placcement Cell, VGU :

DR.DHIRAJ SINGH

1. Introduction

This report presents my detailed learning experience during the Python Internship at LinuxWorld Informatics Pvt. Ltd., Jaipur. The internship focused on building a strong foundation in Python programming and applying it to real-world use cases, including data handling, automation, APIs, and basic application development. LinuxWorld is known for its hands-on training environment, industrial exposure, and practical project-based learning. Through this internship, I was able to improve my technical skills, coding abilities, and problem-solving mindset.

2. Objectives of Internship

The main objectives of this internship were:

- The major objectives of the Python internship were:
- To understand the core concepts of Python programming.
- To learn data structures, logical programming, and automation.
- To work with Python libraries like NumPy, Pandas, and Matplotlib.
- To understand real-world applications of Python in data analysis and APIs.
- To develop mini-projects and one major project.
- To gain experience under industry professionals at LinuxWorld.

3. Work Done / Tasks Completed

During my internship at **Linux World**, I was assigned the following tasks:

Project 1: Student Management System (Console-Based)

Description:

A Python-based CRUD system to add, update, delete, and display student data.

Technologies:

Loops, Dictionaries, File Handling.

Outcome:

Learned real-life record management and data storage.

Project 2: COVID-19 Data Analysis

Description:

Analyzed a CSV dataset, performed data cleaning, and visualized cases & recoveries.

Libraries Used:

Pandas, Matplotlib.

Outcome:

Understood the role of Python in Data Science.

Project 3: Weather Forecast Application (API-Based)

Description:

Fetched live weather of any city using OpenWeatherMap API.

Libraries:

Requests, JSON.

Outcome:

Improved understanding of APIs and data parsing.

Major Project: Expense Tracker Application

Description:

A Python program to manage daily expenses, generate monthly summaries, and visualize spending.

Features:

Add/Delete expenses

Monthly report

Graphs for spending

File storage (CSV)

Outcome:

Hands-on experience with practical application development.

4. Skills Learned

Throughout this internship, I learned both **technical** and **soft skills**, including:

Technical Skills:

- Front-end technologies (HTML, CSS, JavaScript, Bootstrap)
- Web page structure and responsive design concepts
- Version control using Git and GitHub

Soft Skills:

- Strong foundation in Python programming
- Real-time data analysis skills
- File handling & automation
- API usage
- Logical thinking & debugging
- Hands-on project development
- Teamwork & communication during project discussions
-

5. Challenges Faced

During the internship, I faced several challenges such as:

- Debugging syntax errors and logical issues
- Working with large datasets
- Understanding API requests and JSON formats
- Time management during project deadlines
- Implementing OOP concepts in real projects
- These challenges helped improve problem-solving and made me more confident in coding..

Despite these challenges, continuous guidance from mentors helped me overcome difficulties and improve my performance.

6. Outcome / Learning Experience

- **Strong foundation in Python programming**
- **Real-time data analysis skill**
- **File handling & automation**
- **API usage**
- **Logical thinking & debugging**
- **Hands-on project development**
- **Teamwork & communication during project discussions**

7. Conclusion

The Python internship at LinuxWorld Informatics Pvt. Ltd. was highly enriching and helped me gain industry-relevant skills. The training was practical, well-structured, and guided by experienced professionals. This internship has prepared me for future opportunities in programming, data analytics, and software development.

Specially Thanks To Jibrran ali sir for teach us & also Thankful for Dr.Dhiraj Singh Sir

INTERNSHIP CERTIFICATE

This is to certify that **Mr. Ghanshyam Kumar Jha** has successfully completed the "**Python Programming & Automation Internship Program**", where the candidate underwent structured technical training and executed multiple real-world projects in Python development, automation, and application design.

The duration of the project undergone as mentioned above, under the mentorship of Mr. Syed Jibbran Ali, Technical Head was for 40+ hours in the month of November 2025.

During the internship, the candidate demonstrated strong problem-solving skills, programming proficiency, and the ability to build end-to-end Python applications. The management will continuously monitor his performance during the summer period of research and development.

Projects Completed During Internship

1. Calculator Application
2. ATM Cash Withdrawal System
3. Custom Unit Conversion Tool
4. Movie Ticket Booking & Validation System
5. File Transfer System using Python
6. Interactive Dashboard using StreamlitAI
7. Chatbot Development
8. Text-to-Speech & Speech-to-Text System
9. RESTful API Development using Flask
10. Email Automation using Python
11. SMS Automation using Python
12. WhatsApp Messaging Automation using Python

LinuxWorld Informatics Pvt. Ltd.

CIN: U72900RJ2012PTC039171

Internship Outcome

The intern has demonstrated technical proficiency in:

- Python Programming
- Automation
- Flask Web Development
- Streamlit Dashboards
- API Development
- AI Components
- Communication Automation
- Real-time Project Development
