ASSIGNMENT

1. WAP to find the length of the string.
2. WAP to print the even length words in a string.
3. WAP to swap commas with dot in a string.
4. WAP to check if the letter 'e' is present in the word 'Umbrella'.
5. WAP to display the string in following ways:

   Sample String: **compound subjects, compound verbs, prepositional phrases**

   (a) Output: cdcmvptp
   (b) Output: phrases
   (c) Output: uutonrpsn
   (d) Output: und s
   (e) Output: sesarhp lanoitisoperp ,sbrev dnuopmoc ,stcejbus dnuopmoc

6. WAP to take two input in a single line using split method.

7. WAP to check if the string contains both characters and words.

3. WAP to swap commas with dot in a string.
4. WAP to check if the letter 'e' is present in the word 'Umbrella'.
5. WAP to display the string in following ways:

   Sample String: **compound subjects, compound verbs, prepositional phrases**

   (a) Output: cdcmvptp
   (b) Output: phrases
   (c) Output: uutonrpsn
   (d) Output: und s
   (e) Output: sesarhp lanoitisoperp ,sbrev dnuopmoc ,stcejbus dnuopmoc

6. WAP to take two input in a single line using split method.

7. WAP to check if the string contains both characters and words.

8. What will be the output of following code:

```
1. example='Hello'
   print(example.find('j'))
```

<25000 2.0%

7. **Write a program to implement a calculator.**
8. **Write a program to find the output of $1^2+2^2+3^2+....n^2$**
9. **Write a program to input a number and check whether it is mirror or not.**

```
12 -> 144-> 441->21-> 12
```

10. **Write a program to input a number and check whether it is prime or not**
11. **Write a program to find the reverse of a number.**
12. **Write a program to input a number and check whether it is palindrome or not.**

7. **Write a program to implement a calculator.**
8. **Write a program to find the output of $1^2+2^2+3^2+....n^2$**
9. **Write a program to input a number and check whether it is mirror or not.**

   12 -> 144-> 441->21-> 12
